

What you are fialing to see is that we pay a fee every month or year to get this service and there should be no cause for anyone to try to restrict or inhibit the content or quality of our programing or the our right to expect our provider to change up on us;we do all have written and signed contracts that we enterd into with good faith and if the networks want to get in on the action maybe they ought to start asubscriber list and join the 21st century. Stop knit picking every little thing,that's why America is in such bad socio-economic condition now every body wants a peice of everybody! Back off and leave well enough alone before we all end up in the toilet!
